EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. James Hosmer on 13 December 2004.

The application has been amended as follows:

In the claims:

Claim 6 was cancelled.

In claim 2, line 1: "claim 11" was deleted and replaced with --claim1--;

In claim 3, line 1: "claim 11" was deleted and replaced with --claim1--;

In claim 4, line 1: "claim 11" was deleted and replaced with --claim1--;

In claim 5, line 1: "claim 11" was deleted and replaced with --claim1--;

In claim 7, line 1: "claim 11" was deleted and replaced with --claim1--;

In claim 8, line 1: "claim 11" was deleted and replaced with --claim1--;

In claim 9, line 1: "claim 11" was deleted and replaced with --claim1--;

In claim 10, line 1: "claim 11" was deleted and replaced with --claim1--.

In the specification:

Title was replaced with --An Apparatus For Converting Coal Into Fuel Cell Quality Hydrogen And Sequestration-Ready Carbon Dioxide--.

In the abstract, line 1: "A process" was deleted and replaced with --An apparatus--;

lines 4-5: "turbines characterized by using a combination of" was deleted and replaced with --turbines. The apparatus includes--;

lines 6-7: "reactor, the first reactor being" was deleted and replaced with --reactor. The first reactor is--;

lines 8-9: "reactor, the second reactor being" was deleted and replaced with --reactor. The second reactor is--;

lines 15-24: deleted in their entirety.

In [0001] line 2: deleted "2001." and inserted --2001, now U.S. Patent No. 6,669,917.--

2. The following is an examiner's statement of reasons for allowance:

The closes prior art is Moss (USP 3,807,090) and Leas (USP 5,776,212). Moss discloses an apparatus comprising two fluidized bed reactors containing a mixture of circulating solids containing coal CaO, and/or MgO in presence of alumina and iron (see abstract, C1/L7-17 and Fig. 9). Leas discloses an apparatus comprising a gasification reactor having an inner gasification zone, an outer steam gasification zone, a synthetic coal reaction zone, and an upper line treating zone, a synthetic coal heating vessel and limestone treating vessel (see abstract, C5/L15-C8/L27 and Fig. 1).

However, the prior art does not disclose, teach or suggest an apparatus consisting of first, second and third reactors containing a mixture of fluidized solids circulating among all three reactors, said circulating solids containing coal, calcium compounds present as CaO, CaCO₃ and mixtures thereof, and iron compounds present as FeO, Fe₂O₃ and mixtures thereof as recited in the instant claims. Nor there is any motivation in the prior art to modify the apparatus of Leas or Moss to arrive at instantly

claimed apparatus. Therefore, the claim combination reciting the apparatus consisting of first, second and third reactors containing a mixture of fluidized solids circulating among all three reactors, said circulating solids containing coal, calcium compounds present as CaO, CaCO₃ and mixtures thereof, and iron compounds present as FeO, Fe₂O₃ and mixtures thereof, is allowable over the prior art of record.

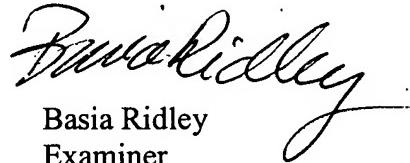

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
